Title

Gaming in the Classroom

(centered & first letters capitalized- no fancy fonts or large type. Center it by using the

"Centering" option from the menu, or the command+shift+E keys)

Is it surprising to discover that surgeons and combat pilots use video games as part of their training? Ranging from pocket-sized portables and cell phone applications that cater to individuals' needs, all the way up to traditional consoles and computers that can bring dozens of players together from around the world, video games are a huge part of modern life. Despite their prevalence, society often looks down on video games and the people who play them. Anti-gaming activists, from parents to politicians, think of video-game play as an idle waste of time and a danger. Unfortunately, these people choose to ignore that there are numerous benefits to gaming.
